ONTARIO EXPORTS AND IMPORTS 1982

A SUMMARY OF PROVINCIAL TRADE STATISTICS FROM THE ONTARIO MINISTRY OF INDUSTRY AND TRADE

FOREWORD

This publication provides statistical information on Ontario's foreign trade, classified by countries, commodity sections and industry sectors.

All statistical tables, unless specified otherwise, have been compiled by the Ministry of Industry and Trade from data provided by Statistics Canada. The Statistical Section is preceded by a brief overview of world trade and highlights of Canadian and Ontario export and import performance in 1982.

The terms "Ontario exports" and "Ontario imports" used throughout this publication denote respectively those portions of Canadian exports and Canadian imports which correspond to the following Statistics Canada definitions:

Ontario Exports—Canadian exports (including re-exports) reported with Ontario as the province of lading.

Ontario Imports—Canadian imports reported with Ontario as the province of clearance.

Requests for copies of this publication or inquiries about the data contained in it should be directed to:

TRADE DEVELOPMENTS, 1982

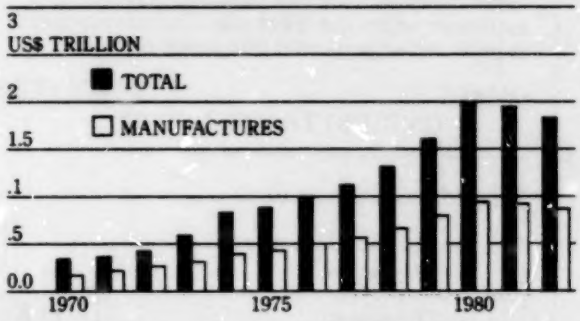
THE WORLD

As noted in Chart I, the world recession resulted in a reduction in global commerce in 1982.

CHART I SOURCE: IMF

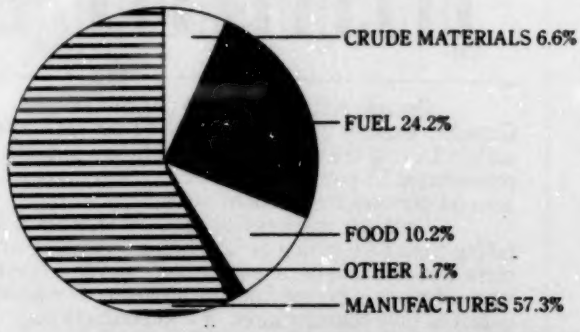
WORLD EXPORTS



In volume terms, the level of trade declined by 2¼ per cent, bringing it to approximately the level of 1979. However, by year-end the international economy had begun to recover from the most pronounced contraction since the 1930's.

CHART II SOURCE: U.N.

WORLD TRADE, 1981



During the year, the value of international trade amounted to US$1.8 trillion. Over half of total world trade consists of manufactured products, as Chart II indicates.

The developed market economies which produced two thirds of world exports accounted for the largest single component of international trade in 1982. Of the remaining proportion, 25 per cent originated in the developing countries. The share of the centrally planned economies amounted to a further 10 per cent of world commerce.

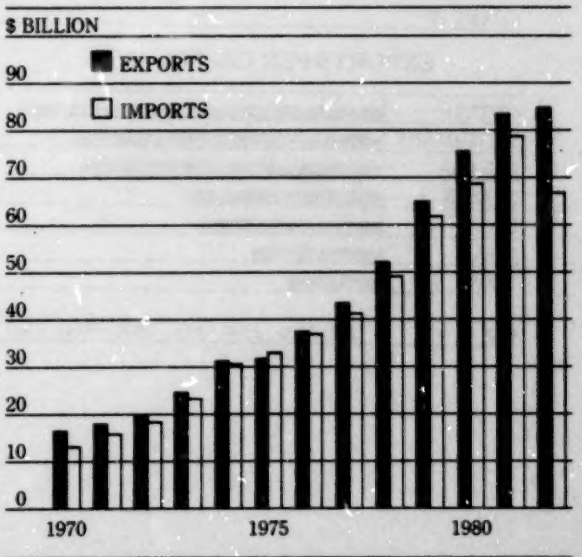
Major features of the international environment influencing world trade in 1982 included the weakness of oil and commodity prices and the external debt problems facing many developing nations. Constrained by these developments, imports by the non-oil LDC's declined by 8 per cent from the preceding year. The imports of the oil exporting countries increased but at rates well below historic levels. The generally sluggish performance of output continued to influence the trade policies of most industrial nations.

CANADA

The international environment restrained the performance of Canadian exports in 1982, although these continued to grow in dollar terms. Total exports during the year amounted to $84.4 billion, up slightly from 1981.

CHART III SOURCE: STATSCAN

CANADIAN TRADE, 1970-82



This represented approximately 4.8 per cent of the exports of the industrialized countries. The largest component of Canadian exports was end or fully manufactured products which accounted for 37 per cent of the value of goods shipped abroad.

Due to an appreciable reduction in imports which dropped by 9 per cent, Canada's merchandise trade balance improved sharply in 1982. For the year, the goods surplus rose to $16.8 billion, a record level. The deficit in fully manufactured products declined, primarily as a result of the significant improvement in Canada's automotive trade with the U.S. During the year, the bilateral vehicles and parts balance swung from a deficit of $1.3 billion to a positive balance of $2.8 billion, the first surplus in automotive trade between the two countries since the early 1970's.

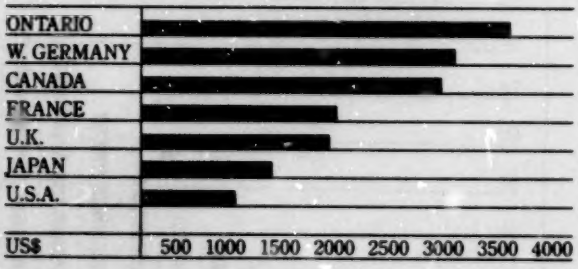
Reduced business outlays for imported capital equipment also contributed to the lower deficit in fully manufactured products trade. By contrast with the improved balance in machinery and automotive trade, weak demand and stiff competition continued to hamper most Canadian exports of semi-processed and resource materials throughout the year.

Despite the negative effects of the recession on the external sector of the economy, Canada continues to depend more heavily on international trade than most other industrialized countries. As Chart IV illustrates, Canada exported more in relationship to its population in 1982 than other important trading nations such as Japan, France, the U.K. and the United States.

Canadian dependence on the world market has also been increasing. In 1982, Canada's exports per capita amounted to $3,426 compared to a level of only $793 in 1970.

CHART IV SOURCE: U.N.

EXPORTS PER CAPITA, 1982



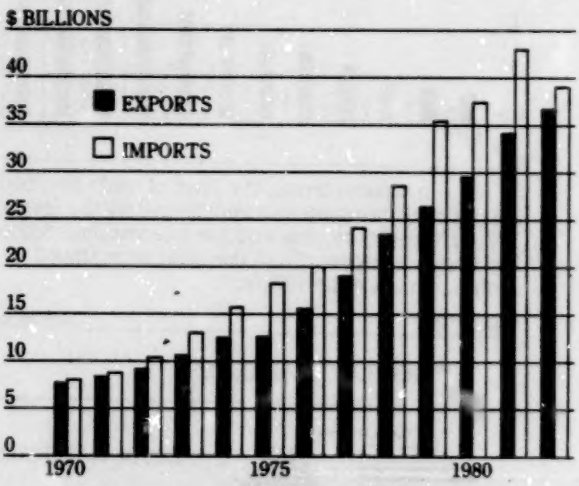
ONTARIO

A) OVERVIEW

Ontario's exports grew by 8 per cent to $36.8 billion last year. Chart V reviews the performance of Ontario's trade since 1970 and indicates the rapid expansion which has taken place in both provincial exports and imports over this period of time.

CHART V SOURCE: STATSCAN

ONTARIO TRADE, 1970-82



Ontario accounted for 44 per cent of total Canadian exports in 1982, up from 41 per cent a year earlier. During the same interval Ontario's imports represented 58 per cent of Canada's imports compared with 54 per cent the previous year.

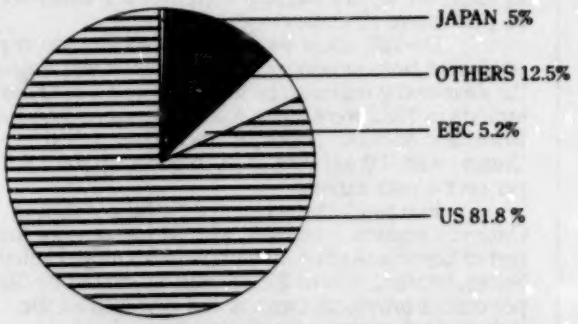
Ontario's trade deficit declined sharply in 1982, falling from $8.9 billion to $2.2 billion. The improvement was due to a decline in imports and to a rise in the value of goods exported from the province. The provincial deficit in fully manufactured or end products also declined, from $8.5 billion to $2.9 billion.

B) ONTARIO EXPORTS

The United States remained the dominant destination for Ontario exports in 1982. Ontario exports to that country totalled $30 billion during the year.

CHART VI — SOURCE: STATSCAN

DESTINATION OF ONTARIO EXPORTS, 1982

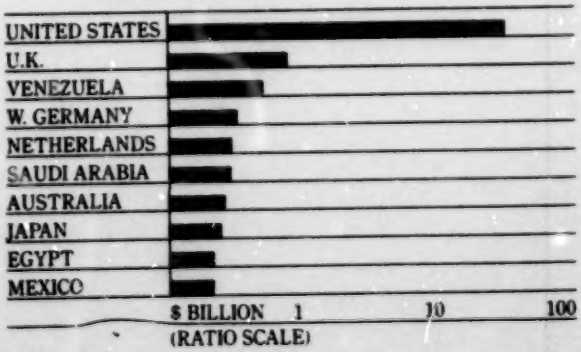


As noted in Chart VI, this represented 82 per cent of exports from the province, up from 78 per cent in the preceeding twelve months. By comparison, 57 per cent of exports from the rest of Canada were destined for the United States. The greatest share of this commerce was with the Great Lakes Region which accounted for over half of the total.

Other top markets for Ontario products in 1982 ranked by dollar value were the United Kingdom ($740 million), Venezuela ($510 million), West Germany ($323 million) and the Netherlands ($292 million). The ten leading export markets listed below in Chart VII accounted for 90 per cent of all sales of provincial products abroad.

CHART VII — SOURCE: STATSCAN

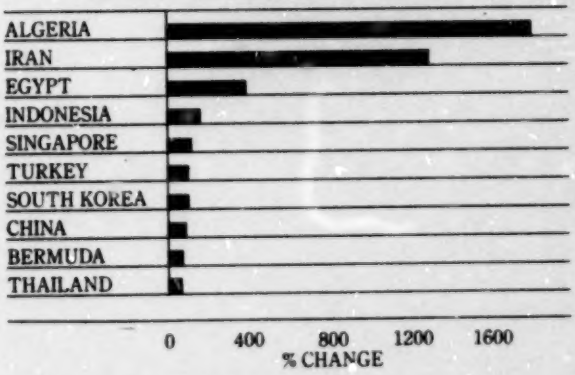
LEADING ONTARIO EXPORT MARKETS, 1982



Exports from Ontario to the industrializing nations of the Pacific Rim and the Middle East have expanded rapidly over the past decade and, despite the balance of payment problems facing some countries, trade with these areas continued to rise. As indicated by Chart VIII which shows the most rapidly expanding markets for Ontario goods in 1982, the sharpest growth took place in Ontario exports to Algeria which rose to $60 million from only $3 million in the preceding year. Exports to Iran, Egypt and Indonesia also increased significantly. Aided by the rebound in motor vehicle trade, Ontario's overall exports to the U.S. climbed by 13.6 per cent from the preceding year. Exports to most European countries declined, hindered both by the recession and the appreciation in value of the dollar relative to the major currencies of the region.

CHART VIII — SOURCE: STATSCAN

FASTEST GROWING ONTARIO EXPORT MARKETS*, 1981/82



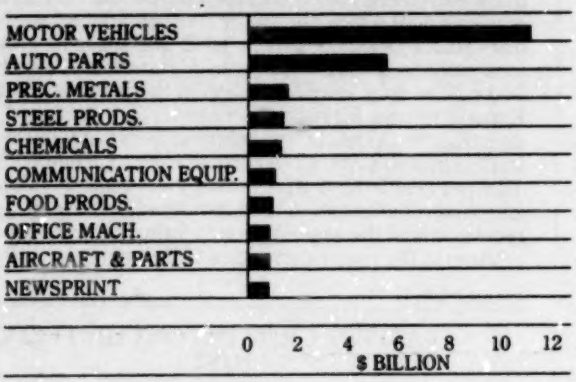
**$20 MILLION OR MORE OF EXPORTS*

Fully manufactured or end products comprised almost two-thirds of Ontario's exports in 1982. Of the fully manufactured products exported by Ontario during the year $16 billion, or 66 per cent of the total, were motor vehicles and parts. The U.S. market accounted for 93 per cent of Ontario's automotive exports in 1982 and these products represented almost half of Ontario's exports to that country. Besides automotive products, other top exports included precious metals, steel products, chemicals, communications equipment, food products and office machines.

Chart IX ranks the ten leading products exported by Ontario to the world by dollar value.

CHART IX SOURCE: STATSCAN

MAJOR ONTARIO EXPORTS, 1982



C) ONTARIO IMPORTS

As in the case of exports, the U.S. continues to be Ontario's leading import supplier. Imports from the U.S. totalled $33.2 billion in 1982. That nation supplied 85 per cent of all Ontario imports during the year.

In second position as a source of imports was Japan, followed by the United Kingdom, West Germany and Hong Kong. Italy replaced Taiwan as the sixth leading supplier of products imported into Ontario. In 1982, the top ten supplier countries accounted for 95 per cent of all Ontario imports.

Overall, about 94 per cent of all Ontario imports originated from developed market economies. Among the developing regions, the leading sources of Ontario imports in 1982 were Hong Kong, Taiwan, South Korea, Brazil and Mexico. These jurisdictions supplied Ontario with 3.0 per cent of its imports, up from 2.6 per cent a year earlier.

End products, accounted for 68 per cent of Ontario's imports, compared with 51 per cent for the rest of Canada. Automotive imports from the United States, totalling almost $12 billion, accounted for 30 per cent of provincial imports and represented the largest single component of inbound trade.

In 1982, Ontario recorded a negative trade balance of $2.2 billion. On a product basis, the province posted a surplus of $3.6 billion in fabricated materials. This was offset by significant deficits in other areas, particularly in fully manufactured products (where the deficit totalled $2.9 billion) despite a significant surplus in assembled vehicles with the United States.

Almost two-thirds of Canada's imports of end products in 1982 were cleared through Ontario. Overall, the province accounted for 58 per cent of the products imported into Canada during the year.
